

Avive Connect AED®

The AED built to be used by anyone, anywhere.

A reimagined AED takes proven defibrillation technology and expands its benefits to the masses with first-of-its-kind capabilities.

FEATURE HIGHLIGHTS

01 High-Resolution Touchscreen

User-friendly design with clear audio and video prompts helps remove intimidation in a time of need.

02 Español Mode

In-rescue Spanish audio and visual instructions at the press of a button.

04 Rechargeable Battery

The only AED with a built-in rechargeable battery. Avoid hundreds of dollars in battery replacement expenses and eliminate hassle to stay ready.

06 Quick Data Retrieval

Scan a QR code to access post-use incident data from the Avive Connect AED immediately after powering off. Quickly send the patient's full incident report to first responders and physicians.

07 Training Mode

Swap in the Avive Training Cartridge and seamlessly train on realistic scenarios on the same device you'd use in an emergency.

03 Child Mode

Press this button to respond to pediatric patients between 1–8 years old. The same electrode pad set for children and adults.

05 Fully Connected

Use Wi-Fi, cellular and GPS to enhance connectivity. No more burdensome, manual, in person checks. Simplify AED maintenance through daily remote monitoring.

The Avive advantage.

The Avive Connect AED is designed to be used without any hesitation. From connectivity, affordability, advanced technology to training, Avive created an advanced, easy-to-use device that anyone can use – trained or untrained.

Smallest and lightest.

Weighing only 2.1 pounds, the Avive Connect AED is the smallest, lightest FDA approved AED available, designed with accessibility, portability, and durability in mind.

One set of electrode pads to respond to both children and adults.

Simply press the Child Button to respond to children 1-8 years old with Child Mode. Save time during an emergency and reduce ownership costs.

User-paced audio and visual instructions.

Always feel confident responding. Reduce hesitation and intimidation with clear, visual directions to help guide you through a rescue.

Lifesaving AED = training AED.

Train on the same lifesaving device you'd use in an emergency – no need for separate equipment. Simply swap in a training cartridge and practice lifesaving skills.

The first and only AED to alert 911.

Give 911 the complete picture. Avive's QuickRescue™ feature automatically contacts 911 when your AED is in use. Providing valuable data to emergency services to support faster response times and informed decision making.

The AED that eliminates manual maintenance.

Our REALConnect™ software uses Wi-Fi, cellular and GPS to enhance connectivity. No more burdensome, manual, in person checks. Simplify AED maintenance with daily remote monitoring.
