

Avive Connect AED®

Elite Cardiac Protection for *Project ADAM Partner Schools*

The *lifesaving impact* of AEDs on campus.

Sudden Cardiac Arrest (SCA) occurs when the heart unexpectedly stops beating. It is the leading cause of death among student athletes and on school campuses. Quick AED intervention dramatically increases survival—making preparedness critical for every school athletic program.

9%

Chance of SCA survival in sports centers, gyms, and athletic facilities **without** an AED on site.¹

89%

Survival rates at sports centers, gyms, athletic facilities, and schools that have AEDs on site.²

1 in 25

U.S. high schools will have a Sudden Cardiac Arrest incident on school grounds each year.³

3x

Athletes are 3x as likely to suffer a SCA when compared to non-athletes.⁴

Why schools and athletic departments *choose Avive*.

911 Integration

The only AED that notifies 911 in real-time during an emergency.

Easy to use

Audio/visual guidance and a CPR metronome. Built in Training Mode.

Ultra-portable

The smallest, lightest AED on the market at 2.1 pounds.

Child Mode

One set of pads to respond to children and adults. Press the Child Button for ages 1-8.

Rechargeable battery

The only AED with a rechargeable battery. No more battery replacement costs.

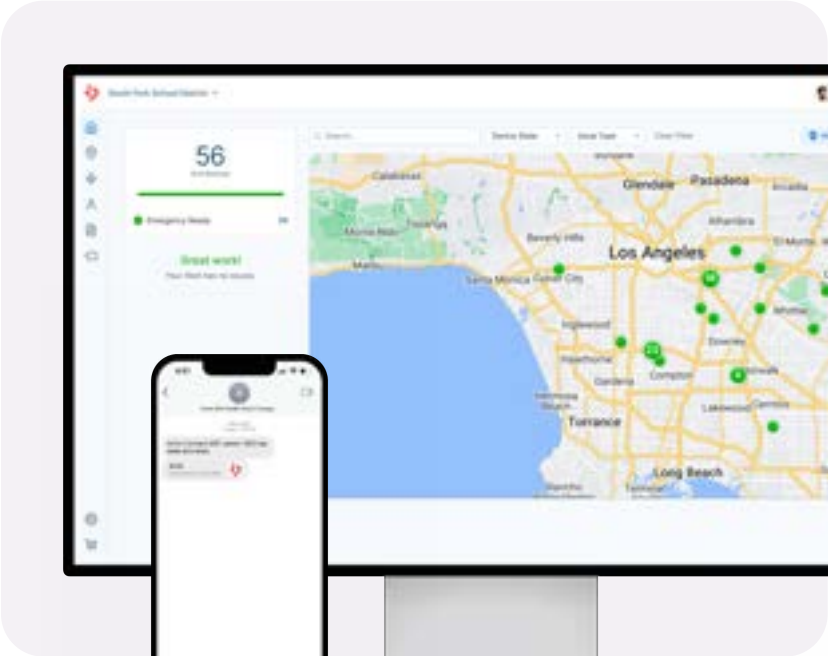

Text message notifications

Get a text and/or email when your AED needs maintenance attention or is in emergency use.

Avive's REALConnect™

Save time and money with streamlined, fully remote program management. No more manual AED checks.

Get real-time status updates on your AED, text and email notifications when something needs attention, and location tracking from one centralized dashboard.

Hear what school safety leaders are saying *about Avive.*

Reedley High School

[Save story](#)

"I had just received the Avive Connect AED that was supposed to travel with me to different locations, or travel with me on my golf cart here at the high school, **roughly two hours prior to the incident.**"

Warsaw Community Schools

[Case study](#)

Athletic trainers now bring AEDs directly to games and practices, ensuring that help is never far away.

Morgan County Schools

[Case study](#)

"Previous to Avive, my nurses were making manual rounds monthly. Getting real-time alerts with REALConnect has been fantastic so far — and I like it on the administrator side because I can see the whole fleet of AEDs."

Boston College

[Case study](#)

"A standard AED doesn't really know its own status or where it is. These new AEDs check in with us every day. Each morning we will get a report on the health and status of every AED on campus—if the batteries need to be charged or replaced, if it's too hot or too cold, or if it was moved."

8 years of REALConnect™ software subscription included

- Free pad cartridge replacements
- \$0 ongoing maintenance costs

Avive Connect AED®

Avive AED Training Cartridge

Avive CPR/AED Rescue Kit

Choice of Semi-Rigid Carrying Case or Responder Bag

Frequently asked questions.

What is the risk of Sudden Cardiac Arrest in athletes?

When compared to non-athletes, [studies show](#) that athletes present a 3x higher risk for cardiac arrest. Intense physical activity can trigger an undiagnosed heart condition or genetic predisposition, leading to a cardiac event. It is important to have AEDs on site at gyms and athletic facilities to ensure you are prepared to quickly intervene in case of an emergency.

Can the Avive Connect AED® be used on children?

Yes! The Avive Connect AED® has one set of electrode pads which allow it to be used on both children and adults without having to buy separate, expensive pediatric keys. Simply press the Child button to use on patients between 1 - 8 years old.

Can the Avive Connect AED® help train my staff or coaches on emergency response?

Yes, the Avive Connect AED doubles as a fully functional training unit, which eliminates the need for expensive trainers that cannot be used during an emergency. Training Mode allows coaches, staff, and athletes to build confidence and familiarity by training on the same device they would in a real emergency. Simply swap in the [Avive AED Training Cartridge](#) to run realistic scenarios.

How many portable AEDs does my gym or athletic facility need?

Another way to think about this question is: how long will it take to retrieve an AED in the event of a cardiac arrest emergency? Every second counts when it comes to saving the life of a person in cardiac arrest, so you want to ensure that an AED is easily accessible by all patrons, members and staff. As a general rule, you want to have an AED within a 2 minute round-trip from anywhere in your facility, and it should be placed in a visible, highly trafficked location.
